21
YEARS
experience

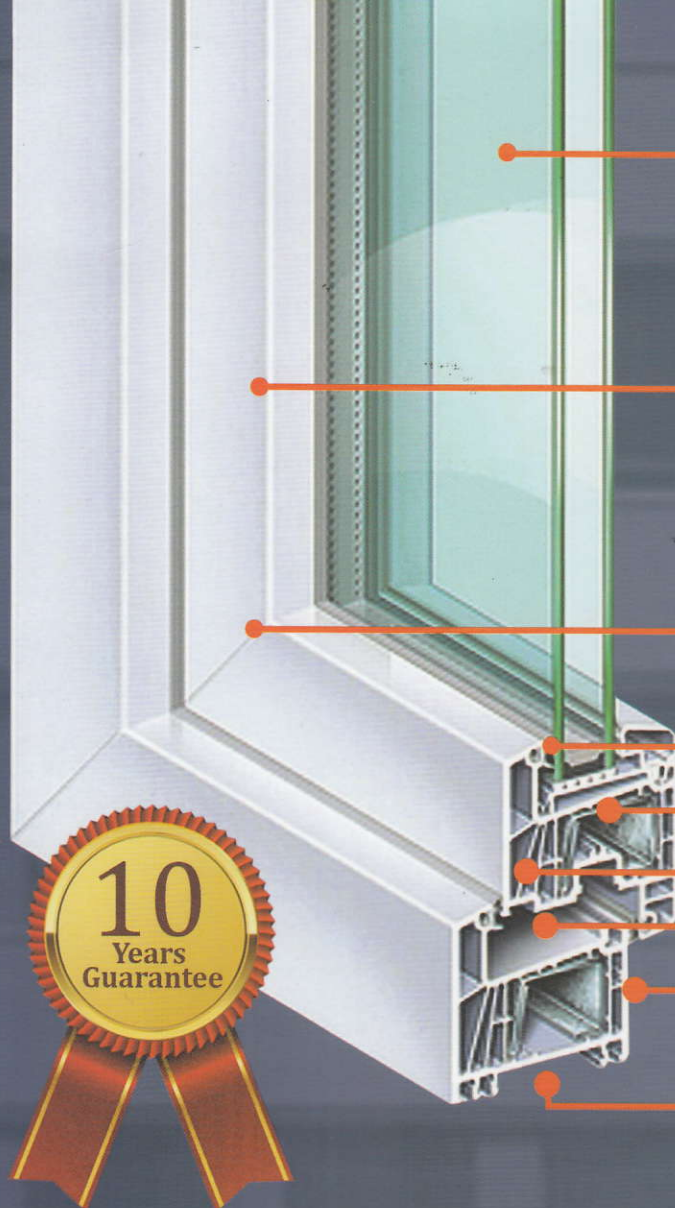

The Highest European Standard In Windows System

70mm
Profile Series

MADE IN GERMANY | www.fega.co.id

Provides various glass types with different thicknesses
(From 6-46mm, to maximum 62mm with extension)

A fully new, modern functional design of straight lines

Joint on the corner of the profile is done by "Fusion Welding"
process with optimum temperature and pressure without any
additional material, so that the whole point of connection will
be strong.

Durable EPDM gasket, joint sealed with the profiles, due to
co-extrusion process can resist any weather condition

Integrated design protected steel reinforcements

The new up to five chamber profile, with weather seal system
produces superior thermal and noise insulation

New, smooth and easy care innovative inner slopes

Class A, high impact resistance outer layer with up to
3,2 mm thickness

The 70mm depth installation makes FEAGA PVC-U profiles
stronger and more energy efficient than other available
PVC-U window system profiles in the market

Our PVC-U products comes with a 10 year guarantee.

You can therefore rest assured that all maintenance and care, as well as repairs
and replacements, are completely covered.

If you have a problem, simply give us a call and one of our team will be with
you right away to help.

FEAGA PVC-U window and door system have successfully used in swimming pools area, marine and ocean environments
without deterior-ation of surface finish or performance. resistance to driving rain and joint tightness are major assets of
FEAGA window and door systems.

Profile Series

Your expert for PVC-U window

"The technology for windows with the best features"

WINDOWS PROFILE

■ Europe's no.1 PVC-U Windows Profile

The High performance compound used and developed exclusively is komalit Z. the longevity and superior quality of this material has been conclusively proved for almost 40 years. this material compound performs to worldwide standars for strength, heat stability, colour retention, and termite resistance.

THIEF RESISTANCE

■ Safety Home

Burglars often break into house through windows, balconies and patio doors. FEGA PVC-U offers you protection againts intruders because the window is design optimised for anti-burglary fitting and safety glass.

REDUCE NOISE

■ Protection against noise

FEGA PVC-U protects you and your family from noise pollution. its innovative profile sealing technology in conjunction with sound-insulating glazing ensures a peaceful and quiet living environment even when you live close to a busy road.

SECURITY WINDOWS

■ The Highest Security Windows System

You can achieve very effective protection againts such unpleasant surprise thanks to europe No.1 PVC-U windows Profile.FEGA PVC-U Sashes and Frames are made of stable , high impact resistant multi Chambers PVC-U Profiles with integrated steel reinforcement.

MAXIMUM WATER TIGHTNESS

■ Maximum water tightness and wind resistance

FEGA PVC-U Profiles fulfil the requierements of the american standards AS 4420 and AS 2047. The Windows are watertight up to 450 PA (N6). Due to their excellent material properties, FEGA PVC-U windows and doors are ideal for installation in buildings located in coastal areas. these areas typically have permanent exposure to strong wind, heavy rain and salty air. the windows have passed several severe test designed by official institutions.

THERMAL INSULATION

■ Efficient Thermal insulation Windows System

No matter in which climate FEGA PVC-U windows and doors are installed, They contribute to a cosy and comfortable atmosphere in your home. As the design of the profiles system prevents thermal bridging, the thermal insulating performance of the finished window is exceptionally good. The glazing is also of outmost importance for good thermal values , also contributing to a substantial energy saving.
